

QC METAL FABRICATORS, INC.

Our E2 Industry Partner in:

Metal Fabrication

About QC Metal Fabricators:

QC Metal Fabricators, Inc. supplies prime quality fabricated metal products to the automotive and RV industries, among others. About 25 employees work in the shop, which sees its mission as providing customers with quality products and service at the most affordable prices, "Thereby supplying value".

Brad Stacy, general manager of QC Metal Fabricators, was looking for an affordable software package to ease some of the time-consuming paperwork he faces each day.

Why did QC Choose E2?

Brad Stacy is responsible for the daily time management and quality control in his shop. He had to check his time tickets manually, costing him valuable hours out of his day. Inventory purchasing history could not be accurately tracked without manually reviewing previous purchase orders, and orders ready for shipment were not properly tagged, because his previous software created packing not slips from the orders, but from the invoices.

"I think E2 helps me compete because it keeps our overhead down. Instead of having to hire more staff to pull reports, we're letting the software do it."

- Brad Stacy,
QC Metal Fabricators

The Results ... So Far:

Brad Stacy estimates that he now spends only a fraction of the time he used to spend monitoring the quality and progress of the jobs in his shop. He tracks his inventory costs more accurately, and has streamlined his shipping process. All of the information he needs is readily available through his E2 system, and the standard system reports consolidate information from several different sources at the touch of a button.
